Letter of Appreciation

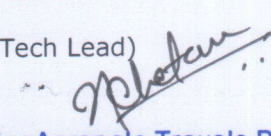

This letter is written in appreciation and recognition of **Mindset Software Technologies** efforts in security vulnerability research on our servers.

The ability to detect and report on security vulnerabilities is a valuable skill in the information security industry. It is encouraging to see that there is a growing contingent of companies, like you.

I hope that you will accept this letter as a token of my appreciation for your efforts in detecting this vulnerability. We are all in this together as a security community and your participation and expertise is commended. We really appreciate your cooperation. We wish you all the best for your future endeavours.

Haimal Khetan
