Mindset Software Technologies Helps To Improve VRM Security

We are grateful to Mindset Software Technologies for their work in reviewing our web based application and reporting their findings. They were able to find a security vulnerability on our platform, and with their help, we were able to fix and patch this within minutes. A release was pushed out to all impacted customers within hours. We are thankful for companies such as Mindset Software Technologies working to help to improve our software and make it more secure and believe that companies such as our can greatly benefit from similar reviews from security professionals.

A handwritten signature in blue ink, appearing to read 'Michael Hill', is positioned above the printed name.
